

OBI Model Portfolio Active 8

November 2020

Objective

This portfolio is NOT a risk-free portfolio, rather, it is suitable for a client whose is prepared to invest into equities for most of the time and is focused more on the return than the risk, hoping that by doing this they can achieve greater long-term returns. The portfolio is managed dynamically by altering the asset allocation using assets that carry market risk and using all assets that are available from the investment universe. The asset allocation in this portfolio will vary between a benchmark of 0% equity and 85% equity to achieve the portfolio objectives, provided economic conditions permit. **The portfolio will be managed to try and limit the indicative capital loss in any 12-month period to 18% following a significant event and 9% in normal market conditions and to target an annualised total return averaged out over a full economic cycle (5 – 7 years) of 9% before any adviser, custodian, switch and/or discretionary investment management fees, but after fund manager charges.**

Management

The benchmark we use for comparison purposes for volatility is **AFI Balanced** noting that this benchmark currently holds **69.31% in Equity** (Analytics, 2nd November 2020) and is therefore less aggressive than this portfolio. The benchmark also has no capital preservation mandate. It would therefore be expected that the model would outperform the benchmark and that the volatility of the model would be higher. The model performance therefore cannot be directly compared to the benchmark.

Performance

Asset	1 Month	3 Months	6 Months	12 Months	YTD	3 Years	5 Years	7 Years	Since Launch 08/03/2016
OBI Active 8 Portfolio	-0.19%	4.06%	10.78%	4.27%	1.62%	-0.30%			23.73%
Benchmark	-1.51%	0.67%	6.58%	-0.29%	-3.15%	5.10%	28.80%	41.81%	29.51%

Outcome Based Investing

At OCM, we believe that assets in a client portfolio should be adjusted through each phase of the economic cycle.

In line with the OBI strategy, at the extreme point when the cycle is at its most extended and the economies are overheating, it is our view that by moving defensively and focusing on the core portfolio assets, we are able to provide the desired outcome with the least amount of expected volatility.

The key with the strategy of “Outcome Based Investing” is to limit the surprises and capture as much of the upside as possible, with a focus on delivering the client’s strategised outcome.

Asset Allocation

- MONEY MARKET (7.13%)
- UK FIXED INTEREST (3.37%)
- GLOBAL FIXED INTEREST (1.82%)
- OTHER NON-EQUITY (0.68%)
- PROPERTY (12.18%)
- UK EQUITY (21.52%)
- NORTH AMERICAN EQUITY (16.34%)
- EUROPEAN EQUITY (18.76%)
- ASIAN EQUITY (11.17%)
- OTHER INTERNATIONAL EQUITY (7.03%)

Equity 74.82% - Non-Equity 25.18%

Our OBI Active 8 portfolio is our most aggressive portfolio which is still considered balanced, with the delivery of outcome and capital preservation at its core which aims to achieve a return outcome of 9% per annum.

Market Outlook

Overall, momentum remains positive, and we continue to observe supportive conditions for risk assets moving forward. It is our view that we will continue to experience a further recovery in activity over the coming months despite the new Covid-induced restrictions across much of Europe and rising virus cases elsewhere in the world. We believe that the latest lockdown measures will be less economically damaging than we saw earlier in the year due to their less stringent nature, while businesses have adapted in recent months, with more companies able to continue operating as normal during the lockdown period. That being said, we do expect the pace of economic recovery to slow and become less consistent across economies. Moving into 2021, we still expect that growth will remain well supported, bolstered by low international interest rates alongside continued support from central banks and governments as the global economy returns to the new normal.

After a strong rebound in global equities in the second and third quarters, we are beginning to see a return of heightened intraday volatility, as investors pause to weigh up several upcoming risks. This is expected given the market conditions and current economic landscape, and it is completely normal as we transition between the recession and recovery stages of the cycle. We view Brexit developments, a second wave of virus cases and the US election as sources of near-term volatility, but positive COVID-19 vaccine developments, dovish central banks and an ongoing economic recovery should allow equity markets to push higher over the medium-term, with conditions remaining supportive for risk assets.

Portfolio Positioning

Our outlook remains positive and unchanged in terms of growth and return expectations moving forward, and we have not made any changes to positioning on the back of the changes in lockdown restrictions. We are optimistic on the medium-term outlook from here (accepting further volatility), and remain confident in our positioning, with well diversified portfolios which have been designed to weather these market conditions.

The portfolio has been constructed with a high level of diversification in terms of asset classes and geographies, with a mix of bond, equity, and property exposure to meet the portfolio objectives over the long term. The exposure is gained through a high-quality mix of actively managed and passive, globally diverse equity and multi asset funds. The property exposure within the portfolio is gained through direct, bricks-and-mortar UK property funds.

Portfolio Volatility

This scatter chart reflects annualised volatility and return in GBP over the past 4 years. Over the long term, we would expect the OBI portfolio to exhibit a lower level of volatility than the benchmark.

Key	Name	Annualised Performance	Annualised Volatility
A	UK Psy UK Gilts TR in GB	4.04	5.83
B	AFI Balanced TR in GB	3.85	10.14
C	OBI Active 8 - Sept 2020 TR in GB	3.85	7.37
D	UK Psy UK Equities TR in GB	-1.15	13.55

Important Information

All data in this document has been extracted from Analytics as at 2nd November 2020. Past performance cannot be used as a guide to future performance and the value of your investment will fall as well as rise in value. You may not get back all of your investment and the final value of your investment will depend on the performance of your portfolio. Performance figures quoted include fund manager charges but exclude adviser, discretionary, custodian and switch charges. Unless stated, income is reinvested into the portfolio.
