# **OBI Model Portfolio Active 6**

Independent Financial Planners | Discretionary Asset Managers | Tax Advisers

May 2021

## **Objective**

This portfolio is NOT a risk-free portfolio, rather, it is suitable for a client who is prepared to invest into equities at the right time and is focused on both the risk and return and looking to achieve a balance. The portfolio is managed dynamically by altering the asset allocation using assets that carry market risk and using all assets that are available from the investment universe. The asset allocation in this portfolio will vary between a benchmark of 0% equity and 65% equity to achieve the portfolio objectives, provided economic conditions permit. The portfolio will be managed to try and limit the indicative capital loss in any 12-month period to 12% in a significant event and 7% in normal market conditions and to target an annualised total return averaged out over a full economic cycle (5 – 7-year period) of 7% before any adviser, custodian, switch and/or discretionary investment management fees, but after fund manager charges.

#### Management

The benchmark we use for comparison purposes for volatility is **AFI Balanced** noting that this benchmark currently holds **69.44% in Equity** (Analytics, 3rd May 2021) and is therefore more aggressive than this portfolio. The benchmark also has no capital preservation mandate. It would therefore be expected that this benchmark would outperform the model and that the volatility of the benchmark would be higher. The model performance therefore cannot be directly compared to the benchmark.

# **Outcome Based Investing**

At OCM, we believe that assets in a client portfolio should be adjusted through each phase of the economic cycle.

In line with the OBI strategy, at the extreme point when the cycle is at its most extended and the economies are overheating, it is our view that by moving defensively and focusing on the core portfolio assets, we are able to provide the desired outcome with the least amount of expected volatility.

The key with the strategy of "Outcome Based Investing" is to limit the surprises and capture as much of the upside as possible, with a focus on delivering the client's strategised outcome.

May 2021

Our OBI Active 6 portfolio is a balanced portfolio with the delivery of outcome and capital preservation at its core which aims to achieve a return outcome of 7% per annum.

#### Market Outlook

Having started the year on strong footing, the majority of global regions have seen their economic fundamentals continue to improve as vaccination rates and policy stimulus help to drive upward revisions in economic data. The UK and US have been leaders in the inoculation efforts since January, and Europe's vaccination efforts have surged over the past month, helping to support the forecast of an economic boom later this year. Although the improving outlook contributed to the acceleration in government bond yields in February and March, yields thereafter remained stable in April, helping to mitigate investor concerns over future rises in interest rates. As April came to a close, global investors increasingly drew their attention to the Federal Reserve, principally focusing on the policy maker's inflation expectations and potential policy response. With the recent events considered our economic outlook remains strong, and we see the economic data continuing to improve as policy makers remain accommodative concurrently.

As long-term investors, we have viewed many of the market movements in 2021 as short-term noise, with no changes to our underlying assumptions on the global recovery and market outlook. Looking further ahead, although it is clear that volatility remains in the short-term as early cycle dynamics unfold, we remain optimistic and continue to see opportunities arising as the outlook improves, with global growth remaining well supported by governments and central banks.

## **Portfolio Positioning**

**Portfolio Volatility** 

The portfolio has been constructed with a high level of diversification in terms of asset classes and geographies, with a mix of bond, equity, and property exposure to meet portfolio objectives over the long term. The exposure is gained through a high-quality mix of actively manged and passive, globally diverse equity and multi asset funds. The portfolio has recently benefitted from its diverse asset allocation, reducing recent market volatility when compared to the benchmark. While we expect to see further volatility in the short term, we remain content with our positioning, and we remain well placed to benefit from an improvement in economic fundamentals over the year.

#### Mean Ann. Volatility of 10.02 Mean Ann. Performance of 8.00 8.0 7.0 Performance C 6.0 5.0 Ş 4 N 3.0 2.0 8.0 12.0 14.0 16.0 17.0 19.0 7.0 13.0 15.0 18.0 3.0 9.0 10.0 App Volatili 11.0 30/04/2016 - 30/04/2021 @FE fundinfo 2021

This scatter chart reflects annualised volatility and return in GBP over the past 5 years. Over the long term, we would expect the OBI portfolio to exhibit a lower level of volatility than the benchmark.
