

OBI Model Portfolio Ultra Cautious

Objective

This portfolio aims to deliver a return that is in line with the Bank of England's base rate whilst providing a greater level of liquidity than fixed term deposits. The portfolio will achieve this objective by investing solely in cash and money market securities, using a dynamic and diversified approach to fund selection to manage risk over the long term. **The portfolio is managed in line with an ultra-cautious risk profile, with the ability to move to 100% cash if required in line with market conditions. This portfolio will not take any risk other than investing in money market assets.**

Management

The benchmark we use for comparison purposes for total return is the **IA Standard Money Market** sector, which is representative of the combined performance of the money market sector.

Yield Comparison

Asset	Yield
Average IA Standard Money Market	4.78%
Bank of England Base Rate	5.25%
Gilts (UK 10 Year)	4.56%
Ultra Cautious Portfolio	5.46%

- MONEY MARKET (98.00%)
- CASH (2.00%)

Outcome Based Investing

At OCM, we believe that assets in a client portfolio should be adjusted through each phase of the economic cycle.

In line with the OBI strategy, at the extreme point when the cycle is at its most extended and the economies are overheating, it is our view that by moving defensively and focusing on the core portfolio assets, we are able to provide the desired outcome with the least amount of expected volatility.

The key with the strategy of "Outcome Based Investing" is to limit the surprises and capture as much of the upside as possible, with a focus on delivering the client's strategised outcome.

OBI Ultra Cautious Portfolio is designed to deliver an ultra-low risk mandate, with the delivery of outcome and capital preservation at its core which aims to achieve a return in line with the Bank of England Base rate.

Market Outlook

Throughout September, investor sentiment fluctuated between optimism that central banks had largely reached their expected peak interest rates and a more cautious view that rising oil prices may weigh on inflationary pressures, meaning rates may need to stay higher for longer. Several interest rate decisions throughout the month, led to further volatility as investors looked for clues on future policy, however whilst the ECB signalled a future pause, and the Fed and Bank of England leaving rates unchanged, an outlook of higher for longer rates weighed on risk appetite.

As we move into the final quarter of the year, we remain somewhat cautious towards equities ahead of upcoming corporate earnings. With equity markets cooling over the month, we believe that there remains a high level of optimism priced into valuations and therefore expect some further weakness moving into the end of the year, with corporate earnings expected to show a weakening of profitability. Although we expect upside potential in equities to be limited in the near-term, it is our view that there remains well positioned, attractively priced areas of the market, particular in more defensive sectors where resilient balance sheets provide both a strong dividend yield and resilience to rising interest rates. Over the longer-term, we believe any equity weakness presents us the opportunity to increase our exposure at more attractive prices, which we believe can drive positive portfolio returns throughout 2024 as macro headwinds continue to ease.

Portfolio Positioning

This portfolio holds a diversified blend of money market funds, that invest in short term money market instruments such as Certificates of Deposit, Government Bills and Time deposits. Whilst this portfolio is positioned to hold 100% in money market instruments to generate a yield, we continually monitor the available money market funds for the best yield and lowest cost, to ensure this portfolio generates the highest yield possible. Through investing in open-ended money market funds, we believe the portfolio can continue to generate an attractive yield at a low cost, whilst allowing a greater sense of flexibility in comparison to fixed deposits.

Bank of England Base Rate

This chart highlights the Bank of England's base rate since 01/01/2021. The yield available on Money market assets typically reflect the Central Bank's underlying interest rate.

Important Information

All data in this document has been extracted from Analytics as at 1st October 2023. Past performance cannot be used as a guide to future performance and the value of your investment will fall as well as rise in value. You may not get back all of your investment and the final value of your investment will depend on the performance of your portfolio. Performance figures quoted include fund manager charges but exclude adviser, discretionary, custodian and switch charges. Unless stated, income is reinvested into the portfolio. The information contained in in this document is for information purposes only. It does not constitute advice or a recommendation or an offer or solicitation for investment.
