

Long Hold Ultra Cautious

Objective

This portfolio aims to deliver a return that is in line with the Bank of England's base rate whilst providing a greater level of liquidity than fixed term deposits. The portfolio will achieve this objective by investing solely in cash and money market securities, using a dynamic and diversified approach to fund selection to manage risk over the long term. **The portfolio is managed in line with an ultra-cautious risk profile, with the ability to move to 100% cash if required in line with market conditions. This portfolio will not take any risk other than investing in money market assets.**

Management

The benchmark we use for comparison purposes for total return is the **IA Standard Money Market** sector, which is representative of the combined performance of the money market sector.

Yield Comparison

Asset	Yield
Average IA Standard Money Market	3.91%
Bank of England Base Rate	4.00%
Gilts (UK 10 Year)	4.40%
Ultra Cautious Portfolio	4.19%

Asset Allocation

- MONEY MARKET (98.00%)
- CASH (2.00%)

Long Hold Investing

The assets in this portfolio have been selected based on a long hold approach, with a recommended minimum investment horizon of 10 years. Unlike OCM's OBI proposition, this portfolio has no capital preservation mandate, and portfolio changes are made on a strategic rather than tactical basis, taking a long-term view on key themes and opportunities within the asset allocation.

The general asset allocation within the portfolio will be maintained over the long term, however underlying funds may be switched at the discretion of the Investment Committee in cases of underperformance or positioning shifts.

The Ultra Cautious Portfolio is designed to deliver an ultra-low risk mandate, with the delivery of outcome and capital preservation at its core which aims to achieve a return in line with the Bank of England Base rate.

Market Outlook

Global financial markets delivered strong returns throughout the third quarter of the year, driven by robust artificial intelligence demand, a strong corporate earnings season, and a well-anticipated rate cut from the US Federal Reserve. Despite a volatile period for government bond markets amid fiscal and political uncertainty, bond markets largely outperformed as yields fell on the back of the prospect of a more dovish US Fed.

A series of weaker than expected US labour market data forced the US Federal Reserve to shift its focus away from stubborn price pressures as it looked to meet its dual mandate of full employment and stable prices. A significant slowdown in job creation allowed policymakers to lower the Fed funds rate by 25bps at its September meeting, and signalled that further easing lay ahead, although the path remains clouded by the ongoing government shutdown.

Positive sentiment fed into European equity markets which rallied despite heightened political uncertainty in France and a lacklustre period for the German economy. Meanwhile, a weaker US dollar and robust AI demand fed into a period of outperformance for Asian and Emerging Market equities, with Japanese equities delivering strong returns on the prospect of a more pro-growth political backdrop and looser fiscal policy.

Portfolio Positioning

This portfolio holds a diversified blend of money market funds, that invest in short term money market instruments such as Certificates of Deposit, Government Bills and Term Deposits. Whilst this portfolio is positioned to hold 100% in money market instruments to generate a yield, we continually monitor the available money market funds for the best yield and lowest cost, to ensure this portfolio generates the highest yield possible. Through investing in open-ended money market funds, we believe the portfolio can continue to generate an attractive yield at a low cost, whilst allowing a greater sense of flexibility in comparison to fixed deposits.

Bank of England Base Rate

This chart highlights the Bank of England's base rate since 01/09/2021. The yield available on Money market assets typically reflect the Central Bank's underlying interest rate.

Important Information

All data in this document has been extracted from Analytics as of 1st October 2025. Past performance cannot be used as a guide to future performance and the value of your investment will fall as well as rise in value. You may not get back all of your investment and the final value of your investment will depend on the performance of your portfolio. Performance figures quoted include fund manager charges but exclude adviser, discretionary, custodian and switch charges. Unless stated, income is reinvested into the portfolio. The information contained in this document is for information purposes only. It does not constitute advice or a recommendation or an offer or solicitation for investment. Portfolio Expense is based on the Fusion platform and may vary for other platforms.
